Galois Theory (Graduate Texts in Mathematics)

By Harold M. Edwards

Galois Theory (Graduate Texts in Mathematics) By Harold M. Edwards

This is an introduction to Galois Theory along the lines of Galois's Memoir on the Conditions for Solvability of Equations by Radicals. It puts Galois's ideas into historical perspective by tracing their antecedents in the works of Gauss, Lagrange, Newton, and even the ancient Babylonians. It also explains the modern formulation of the theory. It includes many exercises, with their answers, and an English translation of Galois's memoir.

Editorial Review

Users Review

From reader reviews:

Charlene Stidham:

As people who live in the modest era should be change about what going on or details even knowledge to make all of them keep up with the era that is certainly always change and progress. Some of you maybe will probably update themselves by examining books. It is a good choice for you personally but the problems coming to anyone is you don't know what one you should start with. This Galois Theory (Graduate Texts in Mathematics) is our recommendation to make you keep up with the world. Why, since this book serves what you want and wish in this era.

Erin Harmon:

This Galois Theory (Graduate Texts in Mathematics) are generally reliable for you who want to become a successful person, why. The key reason why of this Galois Theory (Graduate Texts in Mathematics) can be one of several great books you must have is actually giving you more than just simple reading through food but feed an individual with information that possibly will shock your preceding knowledge. This book is definitely handy, you can bring it almost everywhere and whenever your conditions in e-book and printed kinds. Beside that this Galois Theory (Graduate Texts in Mathematics) giving you an enormous of experience such as rich vocabulary, giving you tryout of critical thinking that we realize it useful in your day activity. So , let's have it and luxuriate in reading.

Victor Green:

In this era which is the greater man or woman or who has ability to do something more are more special than other. Do you want to become one of it? It is just simple solution to have that. What you must do is just spending your time not very much but quite enough to have a look at some books. Among the books in the top collection in your reading list is usually Galois Theory (Graduate Texts in Mathematics). This book which is qualified as The Hungry Inclines can get you closer in becoming precious person. By looking up and review this e-book you can get many advantages.

Gwendolyn Harrison:

As a student exactly feel bored to help reading. If their teacher asked them to go to the library or make summary for some e-book, they are complained. Just very little students that has reading's heart and soul or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that reading is not important, boring in

addition to can't see colorful photos on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Galois Theory (Graduate Texts in Mathematics) can make you feel more interested to read.
