Speciation and Patterns of Diversity (Ecological Reviews) From Brand: The Mathematical Association of America

The diversity of species of plants and animals is the net result of the origin of new species by the splitting of existing lineages (speciation) and the loss of species through extinction. Why there are more species in some groups of organisms, in some places or at some times depends on the balance of these processes. This book explores the interaction between mechanisms and rates of speciation and these patterns of biological diversity, and is unusual in that it brings together the viewpoints of ecologists interested in the processes that generate patterns of diversity and evolutionary biologists who focus on mechanisms of speciation. It is intended to stimulate dialogue between these groups and so promote a more complete understanding of biological diversity.

Editorial Review

Review

'The volume has the potential to stimulate large numbers of interdisciplinary collaborations and new research projects.' Basic and Applied Ecology

About the Author

Roger Butlin is Professor of Evolutionary Biology, Animal and Plant Sciences, at the University of Sheffield. He has held a prestigious Royal Society Research Fellowship at the University of Cardiff and his work has been recognized by honorary fellowships at the Natural History Museum, Zoological Society of London and Royal Belgian Academy of Natural Sciences.

Jon Bridle is a Lecturer in Biology, School of Biological Sciences, at the University of Bristol. Since completing his PhD in Evolutionary Genetics in 1998, he has conducted postdoctoral research in quantitative genetics and evolutionary biology at UCL, University of Cardiff, and Universidad Autonoma de Madrid. He was awarded a fellowship at the Zoological Society of London in 2002.

Dolph Schlüter is Professor and Canada Research Chair, Biodiversity Research Centre and Zoology Department, at the University of British Columbia. He is a former President of the Society for the Study of Evolution and recipient of the Sewall Wright Award from the American Society of Naturalists. He is a Fellow of the Royal Society of London and of Canada.

Users Review

From reader reviews:

Clyde Harlan:

This Speciation and Patterns of Diversity (Ecological Reviews) book is simply not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is actually information inside this e-book incredible fresh, you will get facts which is getting deeper an individual read a lot of information you will get. That Speciation and Patterns of Diversity (Ecological Reviews) without we realize teach the one who studying it become critical in pondering and analyzing. Don't possibly be worry Speciation and Patterns of Diversity (Ecological Reviews) can bring once you are and not make your carrier space or bookshelves' grow to be full because you can have it within your lovely laptop even cellphone. This Speciation and Patterns of Diversity (Ecological Reviews) having excellent arrangement in word and layout, so you will not really feel uninterested in reading.

Holly Walker:

The actual book Speciation and Patterns of Diversity (Ecological Reviews) has a lot info on it. So when you make sure to read this book you can get a lot of help. The book was written by the very famous author. Tom makes some research ahead of write this book. That book very easy to read you may get the point easily after reading this book.

David Gonzales:

This Speciation and Patterns of Diversity (Ecological Reviews) is fresh way for you who has fascination to look for some information since it relief your hunger details. Getting deeper you upon it getting knowledge more you know otherwise you who still having little bit of digest in reading this Speciation and Patterns of Diversity (Ecological Reviews) can be the light food in your case because the information inside this book is easy to get through anyone. These books acquire itself in the form that is certainly reachable by anyone, that's why I mean in the e-book contact form. People who think that in e-book form make them feel tired even dizzy this book is the answer. So there is absolutely no in reading a reserve especially this one. You can find actually looking for. It should be here for anyone. So , don't miss that! Just read this e-book sort for your better life and also knowledge.

Belinda Bridges:

That e-book can make you to feel relax. This specific book Speciation and Patterns of Diversity (Ecological Reviews) was multi-colored and of course has pictures on there. As we know that book Speciation and Patterns of Diversity (Ecological Reviews) has many kinds or type. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and feel that you are the character on there. Therefore , not at all of book are generally make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading in which.
