### Africans: The History of a Continent (African Studies) By John Iliffe

In a vast and all-embracing study of Africa, from the origins of mankind to the AIDS epidemic, John Iliffe refocuses its history on the peopling of an environmentally hostile continent. Africans have been pioneers struggling against disease and nature, and their social, economic and political institutions have been designed to ensure their survival. In the context of medical progress and other twentieth-century innovations, however, the same institutions have bred the most rapid population growth the world has ever seen. The history of the continent is thus a single story binding living Africans to their earliest human ancestors. John Iliffe was Professor of African History at the University of Cambridge and is a Fellow of St. John's College. He is the author of several books on Africa, including *A modern history of Tanganyika* and *The African poor: A history*, which was awarded the Herskovits Prize of the African Studies Association of the United States. Both books were published by Cambridge University Press.

### Editorial Review

#### From Library Journal

Iliffe, an eminent African historian at Cambridge, offers a far-ranging survey of Africa from the development of the human species to the South African elections of 1994. He writes in a thematic rather than strictly chronological fashion. What sets his book apart from other such surveys (e.g., Basil Davidson's African Civilization Revisited, *LJ* 6/1/91. 2d ed.) is his treatment of the environment and population as factors in the development of Africa, including North Africa. Iliffe examines human coexistence with nature, the building up of enduring societies, and African reactions to outside forces; yet he always keeps the contemporary world in mind, focusing on the answers to such basic questions as why Africa remained relatively underdeveloped compared with Eurasian societies or why African states have experienced so many problems over the past couple of decades. Iliffe's excellent, well-written introductory text belongs in all collections of Africana.

#### Review

"Reading this seminal work afresh has made me appreciate just what an extraordinary achievement it really is." -John Parker, *Journal of African History*

#### From the Back Cover

In a vast and all-embracing study of Africa, from the origins of mankind to the South African general election of 1994, John Iliffe refocuses African history on the peopling of an environmentally hostile continent. Africans have been pioneers struggling against disease and nature, and their social, economic and political institutions have been designed to ensure survival and maximise numbers. These institutions enabled them to survive the slave trade and colonial invasion, but in the context of medical progress and other twentieth-century innovations the same institutions have bred the most rapid population growth the world has ever seen. This demographic growth has lain behind the collapse of colonial rule, the disintegration of Apartheid, and the instability of contemporary nations. The history of the continent is thus a single story binding living Africans to their earliest human ancestors.

### Users Review

#### From reader reviews:

##### John Bullen:

Here thing why this specific Africans: The History of a Continent (African Studies) are different and trustworthy to be yours. First of all studying a book is good but it depends in the content of it which is the content is as tasty as food or not. Africans: The History of a Continent (African Studies) giving you information deeper since different ways, you can find any book out there but there is no book that similar with Africans: The History of a Continent (African Studies). It gives you thrill reading journey, its open up your own personal eyes about the thing this happened in the world which is maybe can be happened around you. You can bring everywhere like in area, café, or even in your technique home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Africans: The History of a Continent (African Studies) in e-book can be your alternative.

**Johnnie McCormick:**

Now a day individuals who Living in the era wherever everything reachable by connect to the internet and the resources within it can be true or not need people to be aware of each facts they get. How people have to be smart in having any information nowadays? Of course the answer then is reading a book. Looking at a book can help persons out of this uncertainty Information specifically this Africans: The History of a Continent (African Studies) book because book offers you rich info and knowledge. Of course the info in this book hundred per-cent guarantees there is no doubt in it as you know.

**Pierre Winter:**

This Africans: The History of a Continent (African Studies) is new way for you who has curiosity to look for some information because it relief your hunger associated with.
