My medical physiology course is extremely intense and there is no time to read all of the assigned reading in the textbook. Thanks to this pocket version of the text I am able to review chapters in half the time. I also recommend the textbook which provides detail description of figures that may not be covered in the pocket companion.

Pretty good text and a must for serious advanced physiology students who are headed toward medical or advanced nursing/PA degrees. It helps to simplify and consolidate the immense amount of minute and detailed info stocked up in the big text.

I wish many other books with complex topics had a pocket companion comparable to this one. If the topic is important to your success, then having the pocket companion is indispensable. I see the pocket companion as the architect's view (high level design) of physiology and the first step to learning. Depending on interest and time, you can selectively drill down into the textbook to explain topics of greater importance to you. If a particular topic is not that important you can just read the companion. I have already swept through many chapters and when I hit a chapter I wanted to understand in more detail, such as sports physiology, I went off and read the entire textbook chapter. When other chapters have more detail than I need I stick with the companion. Count yourself lucky to have this pocket companion as a first "cut" to the knowledge in the textbook, it will help immensely during the absorption and after for the quick and convenient recall.

I have been using this book, along with the 'Big Daddy' version for preparation for my surgical primary exams. In summary, it's gold. No, it won't tell you everything that the big book does, and certainly not as much detail as thicker texts like Ganong, but I think that is the real benefit of it. ALL IT HAS IS THE BASIC FACTS, and that is all you need to grasp the concepts and therefore answer most questions. If you are looking for a high distinction on your exams, then take a month off work and read Ganong. If you have less than a week and are trying just to pass, then 'Baby Guyton' is gold. Five stars.
