**Coercive Treatment in Psychiatry: Clinical, legal and ethical aspects** From Wiley

Coercion is one of the most fascinating and controversial subjects in psychiatry. It is a highly sensitive, and hotly debated topic in which clinical practice, ethics, the law and public policy converge. This book considers coercion within the healing and ethical framework of therapeutic relationships and partnerships at all levels, and addresses the universal problem of how to balance safety versus autonomy when dealing with psychiatric treatment.

*Coercive Treatment in Psychiatry* is a much needed contribution to the literature. The first three sections deal with the conceptual and clinical aspects of coercive treatment, the legal aspects and the ethical aspects of coercive treatment. In detail, these sections cover a broad spectrum of issues: coercion in institutions and in the community, coercive treatment and stigma, the definition of best practice standards for coercive treatment, de-escalation of risk situations, recent developments in mental health legislation, mental health care and patients' rights, cross-cultural perspectives on coercive treatment, historical injustice in psychiatry, and paternalism in mental health. The fourth section features users' views on coercive treatment: giving voice to an often-unheeded population. Finally, the book addresses the original topic of coercion and undue influence in decisions to participate in psychiatric research.

This book presents the first comprehensive review of the issue of coercion in psychiatry. With chapters written by the leading experts in the field, many of whom are renowned as clear thinkers and experienced clinicians, it may be seen as a starting point for international discussions and initiatives in this field aiming to minimize coercion.

**Highly Commended in the Psychiatry section of the 2012 BMA Book Awards.**

## **Editorial Review**

### Review

“Summing up then, this is a rich and valuable collection. It comes at a time when ideas about both coercion and treatment are being revised, and in addition to raising more practical and policy-related challenges, it demonstrates important philosophical issues requiring further attention.” (*Metapsychology Online*, 23 April 2013)

### From the Back Cover

Coercion is one of the most fascinating and controversial subjects in psychiatry. It is a highly sensitive, and hotly debated topic in which clinical practice, ethics, the law and public policy converge. This book considers coercion within the healing and ethical framework of therapeutic relationships and partnerships at all levels, and addresses the universal problem of how to balance safety versus autonomy when dealing with psychiatric treatment.

*Coercive Treatment in Psychiatry* is a much needed contribution to the literature. The first three sections deal with the conceptual and clinical aspects of coercive treatment, the legal aspects and the ethical aspects of coercive treatment. In detail, these sections cover a broad spectrum of issues: coercion in institutions and in the community, coercive treatment and stigma, the definition of best practice standards for coercive treatment, de-escalation of risk situations, recent developments in mental health legislation, mental health care and patients' rights, cross-cultural perspectives on coercive treatment, historical injustice in psychiatry, and paternalism in mental health. ### About the Author

**Professor Kallert** has been active in the field of mental health services research for many years. He was co-ordinator of the EC-funded research project, European evaluation of coercion in psychiatry and harmonisation of best clinical practice (EUNOMIA). He has published 6 books, more than 35 chapters in books, and more than 125 articles in peer-reviewed journals. He has received the Hermann-Simon-Prize for Social Psychiatry, and the Hans-Heimann-Prize of the German Society of Psychiatry, Psychotherapy and Neurosciences. He is an Honorary Member of the World Psychiatric Association.

**Dr. Mezzich** was Chair of the World Psychiatric Association (WPA) Section on Classification and Diagnostic Assessment, and a member of the ICD-10 Mental Disorders Workgroup and the DSM-IV Task

Force. He has authored over 200 scientific journal articles and book chapters and 25 books and monographs primarily on psychiatric diagnosis and epidemiology from clinical, philosophical, statistical, and cultural perspectives and more recently on person-centered psychiatry and medicine. He has received six Honorary Doctorates from universities in the Americas and Europe as well as the Simon Bolivar Award of the American Psychiatric Association, the Medal for Extraordinary Merit of the Medical Council of Peru, and the Linneaus Medal of Uppsala University in Sweden. He is President of the International Network for Person-centered Medicine.

**Professor Monahan** is well known internationally for his numerous publications and presentations in mental health law, for his leadership of the MacArthur Research Network on Violence, Coercion and Competence and of the current MacArthur Research Network on Mandated Treatment in the Community, and for his generous support and encouragement of scholars in coercion and in all areas of mental health law.

## **Users Review**

### **From reader reviews:**

#### **Arturo Hasan:**
