## Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS By Goutam Chakraborty, Murali Pagolu, Satish Garla

Big data: It's unstructured, it's coming at you fast, and there's lots of it. In fact, the majority of big data is text-oriented, thanks to the proliferation of online sources such as blogs, emails, and social media.

However, having big data means little if you can't leverage it with analytics. Now you can explore the large volumes of unstructured text data that your organization has collected with Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS.

This hands-on guide to text analytics using SAS provides detailed, step-by-step instructions and explanations on how to mine your text data for valuable insight. Through its comprehensive approach, you'll learn not just how to analyze your data, but how to collect, cleanse, organize, categorize, explore, and interpret it as well. Text Mining and Analysis also features an extensive set of case studies, so you can see examples of how the applications work with real-world data from a variety of industries.

Text analytics enables you to gain insights about your customers' behaviors and sentiments. Leverage your organization's text data, and use those insights for making better business decisions with Text Mining and Analysis.

This book is part of the SAS Press program.

### Editorial Review

#### Review

*"Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS* is much more than a guide to real-world application of SAS Text Miner. The authors present a case-driven approach to explain the broad field of text analytics, the techniques and mathematics behind the curtain, and the advanced capabilities of the SAS toolset.

"When many people think of text analytics, they immediately think of search technologies. Search is only the beginning of the story in text analytics. Natural language processing, predictive modeling and classification, and sentiment analysis are a few examples of other techniques in text analytics that can drive tremendous business value. The authors provide a cogent, example-rich, and understandable introduction to text analytics, including one of the central techniques for analyzing high-dimensional data: the singular value decomposition.

"I would recommend this book as a foundation to anyone interested in applying text mining to real-world problems; the authors' deft presentation of theory and case-based practical application will arm you with the knowledge you need to derive real insight and value from your textual data." --Mark Pitts, MS, MAcc, Senior Vice President, Analytics, SourceHOV

"Text Mining and Analysis is a must read for anyone working in analyzing textual information. It provides a comprehensive, yet concise overview of text analytics with a focus on the business application." --Prof. Dr. Bart Baesens, Programme Coordinator, Master of Information Management, Department of Decision Sciences and Information Management, Katholieke Universiteit Leuven

#### About the Author

Dr. Goutam Chakraborty has a B. Tech (Honors) in mechanical engineering from the Indian Institute of Technology, Kharagpur; a PGCGM from the Indian Institute of Management, Calcutta; and an MS in statistics and a PhD in marketing from the University of Iowa. He has held managerial positions with a subsidiary of Union Carbide, USA, and with a subsidiary of British American Tobacco, UK. He is a professor of marketing at Oklahoma State University, where he has taught business analytics, marketing analytics, data mining, advanced data mining, database marketing, new product development, advanced marketing research, web-business strategy, interactive marketing, and product management for more than 20 years. Goutam has presented numerous programs and workshops to executives, educators, and research professionals in the US, Europe, Asia, and the Middle East. He has won many teaching awards, including the SAS Distinguished Professor Award from SAS Institute, and he teaches the popular SAS Business Knowledge Series course, "Text Analytics and Sentiment Mining Using SAS." Goutam's research has been published in many scholarly journals, such as the Journal of Interactive Marketing, Journal of Advertising Research, Journal of Advertising, Journal of Business Research, and Industrial Marketing Management. He coauthored the book *Contemporary Database Marketing*. In addition, Goutam has served on the editorial review board of the Journal of Business Research and Journal of Academy of Marketing Science. He serves as a member of the SAS Customer Analytics Advisory Board and the JMP Discovery Summit Steering Committee. Goutam has also consulted extensively on issues related to developing digital business strategy, building and managing customer relationships, product development, and management and creation of e-business models with companies such as Aetna, Mercruiser, Thrifty Rent-A-Car, Berendsen Fluid Power, Globe Life Insurance, Vanguard Realtors, Hilti, and Love's Travel Stops. He is the founder of the SAS and

OSU Data Mining Certificate program as well as the SAS and OSU Business Analytics Certificate program at Oklahoma State University.

Murali Pagolu is a Business Analytics Consultant at SAS and has four years of experience using SAS software in both academic research and business applications. His focus areas include database marketing, marketing research, data mining and customer relationship management (CRM) applications, customer segmentation, and text analytics. Murali is responsible for implementing analytical solutions and developing proofs of concept for SAS customers. He has presented innovative applications of text analytics, such as mining text comments from YouTube videos and patent portfolio analysis, at past SAS Analytics conferences. He holds six SAS certification credentials covering a variety of SAS technical skills, including Data Integration, Business Intelligence, Platform Administration, and Base and Advanced Programming techniques using SAS 9. He is also a certified predictive modeler using SAS Enterprise Miner 6. Murali holds a master's degree in Management Information Systems from the Spears School of Business at Oklahoma State University, Stillwater. He was presented the "Outstanding Student" award by the Spears School of Business for his academic excellence in the SAS and OSU Data Mining Certificate program. He is a member of the Marketing Analytics and Data Mining Individual Advisory Board at Oklahoma State University. He is also a member of Beta Gamma Sigma, the international honor society for collegiate schools of business. During his time at OSU, Murali won several scholarships to attend SAS Analytics, SAS Global Forum, and SAS regional conferences. His "Eliminating Response Style Segments in Survey Data via Double Standardization before Clustering" poster was selected as one of the top-5 posters in the student poster competition at the M2010 Data Mining Conference. He is part of a team that won an honorable mention award at the M2010 Data mining Conference and second place at the A2011 Analytics Conference for annual data mining shootout competitions. He received the SAS Student Ambassador award at SAS Global Forum 2011 for his paper on standardization techniques to eliminate response style segments in survey data. Prior to his graduate studies in the United States, he worked as an IT consultant at a software services firm in India for more than four years. During that time, he was responsible for maintaining and supporting straight-through processing (STP) applications for a global financial services firm. He also holds a bachelor's degree in Electrical and Electronics Engineering from Osmania University, India.

Satish Garla is an Analytical Consultant in Risk Practice at SAS. He has extensive experience in risk modeling for healthcare, predictive modeling, text analytics, and SAS programming. He has a distinguished academic background in analytics, databases, and business administration. Satish holds a master's degree in Management Information Systems at Oklahoma State University and has completed the SAS and OSU Data Mining Certificate program. He has three years of professional experience as an Oracle CRM Consultant, and he is a SAS Certified Advanced Programmer for SAS 9 and a Certified Predictive Modeler using SAS Enterprise Miner 6.1. Satish's research in health risk analytics, text analytics, market segmentation, and social media analytics has been presented at SAS Global Forum, JMP Discovery Summit, and other SAS regional conferences. He has developed a SAS macro to collect and analyze customized tweets from Twitter for which he was awarded SAS Student Ambassador for 2011 by SAS. He is also part of a team that won second place in the Data Mining shootout competition 2011 organized by SAS and Central Michigan University. Satish's paper on "Analyzing Sentiments Expressed about Wal-Mart and Sam's Club in Tweets" won first prize in the Walmart analytics competition and SAS Global Forum 2012 social media section. He also contributed a case study on sentiment analysis for the book, Practical Text Mining and Statistical Analysis for Non-structured Text Data Applications.

## Users Review

### From reader reviews:

**Adria Jenkins:**

The ability that you get from Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS may be the more deep you digging the information that hide into the words the more you get thinking about reading it. It doesn't mean that this book is hard to understand but Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS giving you excitement feeling of reading. The article author conveys their point in selected way that can be understood by anyone who read it because the author of this publication is well-known enough. This book also makes your own personal vocabulary increase well. Making it easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having this Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS instantly.

**Bonita Crist:**

The particular book Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS will bring you to the new experience of reading any book. The author style to clarify the idea is very unique. In case you try to find new book to learn, this book very suitable to you. The book Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS is much recommended to you to read. You can also get the e-book through the official web site, so you can more readily to read the book.

**Alma Hillyer:**

You can spend your free time to study this book this reserve. This Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS is simple to develop you can read it in the park your car, in the beach, train along with soon. If you did not get much space to bring the particular printed book, you can buy the e-book. It is make you better to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

**Debbie Gray:**

What is your hobby? Have you heard in which question when you got pupils? We believe that that query was given by teacher to their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person like reading or as reading through become their hobby. You have to know that reading is very important along with book as to be the matter. Book is important thing to add you knowledge, except your personal teacher or lecturer. You discover good news or update with regards to something by book. Many kinds of books that can you choose to adopt be your object. One of them are these claims Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS.
