Write Modern Web Apps with the MEAN Stack: Mongo, Express, AngularJS, and Node.js (Develop and Design) By Jeff Dickey

Traditionally, web applications have been architected so that the back-end houses all the front-end code. This has resulted in heavy projects that are difficult to manage and scale. This book will explain a new way to write web applications by treating the front-end as if it were a third-party (such as a mobile client). This book, written by a practicing MEAN developer, will take a holistic approach to using the MEAN JavaScript platform for creating modern web applications and lay out how to use the MEAN (Mongo, Express, AngularJS, and Node.js) set of tools to create a web application, from installation and setup of the tools to debugging and deploying your app. After an introduction to how web development is changing and the advantages of using the MEAN stack, the author jumps into an introduction to each tool and then dives into using the complete JavaScript-based application stack to build, test, and deploy apps.

Editorial Review

About the Author

Jeff Dickey is a full stack web developer with extensive startup experience in San Francisco and Los Angeles. Jeff has started projects, maintained large enterprise systems, and lead development teams. He brings a developer's perspective and enjoys pragmatism and action while avoiding red tape.

Education is the most important quality in Jeff's life, both as a teacher and a student. He surrounds himself with those smarter than myself to learn as much as possible. His experience teaching has greatly helped his communication skills with less technical people and is incredibly rewarding as well.

Outside of work, Jeff is a teacher at General Assembly Los Angeles and Lead Organizer for the LA Code for America brigade. Through teaching and civic hacking, he hopes to help others solve problems both in business and civic hacking.

Users Review

From reader reviews:

John James:

This book entitled Write Modern Web Apps with the MEAN Stack: Mongo, Express, AngularJS, and Node.js (Develop and Design) to be one of several books in which best seller in this year, this is because when you read this book you can get a lot of benefit into it. You will easily to buy that book in the book shop or you can order it via online. The publisher with this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Cell phone. So there is no reason to you to past this publication from your list.

Deborah Walker:

People live in this new day time of lifestyle always try and must have the spare time or they will get lots of stress from both day to day life and work. So , when we ask do people have free time, we will say absolutely of course. People is human not really a huge robot. Then we consult again, what kind of activity do you have when the spare time coming to a person of course your answer will probably unlimited right. Then ever try this one, reading guides. It can be your alternative throughout spending your spare time, the book you have read is actually Write Modern Web Apps with the MEAN Stack: Mongo, Express, AngularJS, and Node.js (Develop and Design).

Charlotte Neville:

As a scholar exactly feel bored to be able to reading. If their teacher requested them to go to the library or to make summary for some publication, they are complained. Just small students that has reading's spirit or real their pastime. They just do what the trainer want, like asked to the library. They go to there but nothing

reading really. Any students feel that reading through is not important, boring and also can't see colorful photos on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Write Modern Web Apps with the MEAN Stack: Mongo, Express, AngularJS, and Node.js (Develop and Design) can make you really feel more interested to read.

Robert Bowser:

Many people said that they feel bored stiff when they reading a book. They are directly felt this when they get a half elements of the book. You can choose the book Write Modern Web Apps with the MEAN Stack: Mongo, Express, AngularJS, and Node.js (Develop and Design) to make your personal reading is interesting. Your skill of reading skill is developing when you such as reading. Try to choose simple book to make you enjoy to read it and mingle the sensation about book and looking at especially. It is to be very first opinion for you to like to available a book and read it. Beside that the publication Write Modern Web Apps with the MEAN Stack: Mongo, Express, AngularJS, and Node.js (Develop and Design) can to be your brand-new friend when you're truly feel alone and confuse in what must you're doing of their time.
