### **Hormones and Reproduction of Vertebrates, Volume 5: Mammals** From Academic Press

This series of volumes represents a comprehensive and integrated treatment of reproduction in vertebrates from fishes of all sorts through mammals. It is designed to provide a readable, coordinated description of reproductive basics in each group of vertebrates as well as an introduction to the latest trends in reproductive research and our understanding of reproductive events. Whereas each chapter and each volume is intended to stand alone as a review of that topic or vertebrate group, respectively, the volumes are prepared so as to provide a thorough topical treatment across the vertebrates. Terminology has been standardized across the volumes to reduce confusion where multiple names exist in the literature, and a comprehensive glossary of these terms and their alternative names is provided.

- A complete, essential and up to date reference for research scientists working on vertebrate hormones and reproduction - and on animals as models in human reproductive research
- Covers the endocrinology, neuroendocrinology, physiology, behaviour and anatomy of vertebrate reproduction
- Structured coverage of the major themes for all five vertebrate groups allows a consistent treatment for all
- Special chapters elaborate on features specific to individual vertebrate groups and to comparative aspects, similarities and differences between them

### **Editorial Review**

#### **About the Author**

Dr. David Norris has done research in environmental endocrinology and neuroendocrinology for more than 50 years. Dr. Norris is a Professor Emeritus in the Department of Integrative Physiology at the University of Colorado. He received his bachelor's degree from Baldwin-Wallace College and his Ph.D. in 1966 from the University of Washington. Dr. Norris has worked in the area of forensic botany with Dr. Jane H. Bock, since 1982, primarily on developing the use of plant cells in the gastrointestinal tract to aid in homicide investigations. Dr. Norris and Dr. Bock have been involved in investigations in numerous states as well as throughout the State of Colorado. Dr. Norris has been certified as an expert witness in this area for the State of Colorado. With Dr. Bock, Dr. Norris also has consulted on other botanical evidence for criminal investigations. He was elected a Fellow of the American Academy of Forensic Sciences in 2014.

Kristin H. Lopez teaches human reproductive biology through the Department of Integrative Physiology at the University of Colorado-Boulder. With a background in comparative reproduction and endocrinology, she is an editor of the five-volume work *Hormones and Reproduction of Vertebrates* (Academic Press, 2011). Her ongoing work with Colorado Diversity Initiative promotes increased access to higher education of underrepresented students in STEM.

### **Users Review**

#### **From reader reviews:**

##### **Sam Grimes:**

The book *Hormones and Reproduction of Vertebrates, Volume 5: Mammals* make you feel enjoy for your spare time. You can utilize to make your capable considerably more increase. Book can to become your best friend when you getting strain or having big problem with your subject. If you can make studying a book *Hormones and Reproduction of Vertebrates, Volume 5: Mammals* to become your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about some or all subjects.
