Parent-Child Interaction Therapy (Clinical Child Psychology Library) By Toni L. Hembree-Kigin, Cheryl Bodiford McNeil

This practical guide offers mental health professionals a detailed, step-by-step description on how to conduct Parent-Child Interaction Therapy (PCIT) - the empirically validated training program for parents with children who have disruptive behavior problems. Drawn from their own experience in treating hundreds of families, the authors include several illustrative examples and vignettes as well as an appendix with several assessment instruments to help parents to conduct PCIT. An exclusive feature of this volume is a thorough discussion on how to teach parents to do behavioral play therapy and to effectively implement timeout procedures with highly aggressive preschoolers.

Editorial Review

Review

"One could imagine harried parents responding quite well to this method, especially those who have lacked good modeling from their own parents. (Journal of Psychology and Christianity, (Spring 1998) "A very good behavioral approach to improving parenting techniques with behaviorally disordered children is presented in a practical, applied format here. Though intended for clinicians, reasonably intelligent parents will have no difficulty in reading and benefiting from the principles and examples presented." (Readings)
