**Two Degrees: The Built Environment and Our Changing Climate** By Alisdair McGregor, Cole Roberts, Fiona Cousins

The Earth's temperature has been rising. To limit catastrophic outcomes, the international scientific community has set a challenging goal of no more than two degrees Celsius (3.6 degrees Fahrenheit) average temperature rise. Economists agree we will save trillions of dollars by acting early. But how do we act successfully? And what's the backup plan if we fall short?

Setting politics aside, *Two Degrees* reviews the current science and explains how we can set practical steps to reduce the extent of warming and to adapt to the inevitable changes, all while improving the bottom line, beautifying our communities, and increasing human health. The book is a practical guide intended for a broad audience of those who occupy and shape our built environment. The authors provide a clear framework for communities, policy makers, planners, designers, developers, builders, and operators to help manage the impacts and capture the opportunities of our changing climate.

Two Degrees is divided into three sections: Fundamentals, Mitigation, and Adaptation, covering a diverse array of topics ranging from climate-positive communities and low-carbon buildings to the psychology of choice and the cost of a low-carbon economy. After a foreword by Amory Lovins, more than 10 contributing authors share knowledge based on direct experience in all aspects of built environment practice. This book clarifies the misconceptions, provides new and unique insights, and shows how a better approach to the built environment can increase resilience and positively shape our future.

### Editorial Review

#### Review

"This book is a must-read for people who want to know more about how better buildings can be the cornerstone for resiliency in our cities and our communities."? **Rick Fedrizzi**, President, CEO, and Founding Chair, U.S. Green Building Council

"We have our challenge laid out ? *Two Degrees* provides a well-structured guide in which anyone who designs or builds in the built environment can find lasting value."? **Ed Mazria**, founder and CEO, Architecture 2030

"A beautiful book, logically and accessibly laid out. I value its positive approach and rational sequencing for responding to threats that feel overwhelming. It reminds me of the way a doctor approaches a new and very sick patient who presents with a huge medical chart and a problem list that nearly immobilizes us with its complexity. But 'no decision' is a decision, and inaction, oftentimes, but not always, does more harm than good; the case demands a thoughtful action plan. *Two Degrees* disentangles the threats and, in this doctor's mind, offers a 'treatment' plan that can save lives, environments, and resources."? **Richard J. Jackson MD**, *Designing Healthy Communities*, former director of the Centers for Disease Control and Prevention's National Center for Environmental Health in Atlanta and former California Department of Public Health officer

"[*Two Degrees*] is a world-class book. There is a waterfall of ideas... Thoughtful. Clear. *Two Degrees* emerges from some of the best minds in sustainable practice. Enjoy!"? **Jim Cramer**, Design Futures Council; chairman and principal, Greenway Group

"A truly unique approach to meeting the challenge of solving the complexity of global-scale climate change on a human scale, using practical, profitable, and sustainable approaches to developing buildings."? **Jeffrey R. Koseff**, Perry L. McCarty Director of the Stanford Woods Institute for the Environment

"*Two Degrees* connects good science, professional practice, and people, with a dash of passion and optimism. A timely and important contribution, and an enjoyable book, well worth reading and sharing."? **Steve Selkowitz**, Lawrence Berkeley National Laboratory, Building Technology & Urban Systems

"*Two Degrees* presents a clear and cogent approach to building and community design to address the changing climate. As the authors state, this is not a book of theory ? it contains solid strategies from three of the most experienced practitioners."? **William Browning**, Partner, Terrapin Bright Green

### Users Review

#### From reader reviews:

**Brent Cook:**

Book is usually written, printed, or created for everything. You can recognize everything you want by a publication. Book has a different type. As it is known to us that book is important point to bring us around the world. Adjacent to that you can your reading ability was fluently. A publication *Two Degrees: The Built Environment and Our Changing Climate* will make you to possibly be smarter. You can feel much more confidence if you can know about anything. But some of you think in which open or reading a new book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you in search of best book or acceptable book with you?

**Timothy Hawkins:**

The reserve with title *Two Degrees: The Built Environment and Our Changing Climate* contains a lot of information that you can discover it. You can get a lot of help after read this book. This particular book exist new knowledge the information that exist in this book represented the condition of the world now. That is important to you to know how the improvement of the world. This specific book will bring you throughout new era of the globalization. You can read the e-book on your own smart phone, so you can read it anywhere you want.

**Kenneth Roland:**

As we know that book is important thing to add our know-how for everything. By a e-book we can know everything we would like. A book is a set of written, printed, illustrated or blank sheet. Every year has been exactly added. This guide *Two Degrees: The Built Environment and Our Changing Climate* was filled about science. Spend your spare time to add your knowledge about your technology competence. Some people has diverse feel when they reading a book. If you know how big benefit from a book, you can really feel enjoy to read a guide. In the modern era like right now, many ways to get book that you simply wanted.

**Craig Nazario:**

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book ended up being rare? Why so many question for the book? But any people feel that they enjoy to get reading. Some people likes looking at, not only science book and also novel and *Two Degrees: The Built Environment and Our Changing Climate* or even others sources were given understanding for you. After you know how the truly great a book, you feel want to read more and more. Science publication was created for teacher or students especially. Those ebooks are helping them to include their knowledge. In different case, beside science e-book, any other book likes *Two Degrees: The Built Environment and Our Changing Climate* to make your spare time much more colorful. Many types of book like here.
