Image Studies: Theory and Practice By Sunil Manghani

Image Studies offers an engaging introduction to visual and image studies.

In order to better understand images and visual culture the book seeks to bridge between theory and practice; asking the reader to think critically about images and image practices, but also simultaneously to make images and engage with image-makers and image-making processes. Looking across a range of domains and disciplines, we find the image is never a single, static thing. Rather, the image can be a concept, an object, a picture, or medium – and all these things combined. At the heart of this book is the idea of an ‘ecology of images’, through which we can examine the full ‘life’ of an image – to understand how an image resonates within a complex set of contexts, processes and uses.

- Part 1 covers theoretical perspectives on the image, supplemented with practical entries on making, researching and writing with images.
- Part 2 explores specific image practices and cultures, with chapters on drawing and painting; photography; visual culture; scientific imaging; and informational images.

A wide range of illustrations complement the text throughout and each chapter includes creative tasks, keywords (linked to an online resource), summaries and suggested further reading. In addition, each of the main chapters include selected readings by notable authors across a range of subject areas, including: Art History, Business, Cognitive Science, Communication Studies, Infographics, Neuroscience, Photography, Physics, Science Studies, Social Semiotics, Statistics, and Visual Culture.

Editorial Review

Review

'Image Studies provides a clear and challenging account of the crucial issues relating to the study of images. The book brings together approaches from a range of related fields, from art history, sociology, media studies and communications, and uses a variety of examples and practical tasks in what adds up to an invaluable teaching and study tool for students and academics alike.' - *Richard Rushton, Lancaster University, UK*

'Sunil Manghani's engaging new study offers a balanced and well-reasoned account of current theoretical debates and insights with regard to images in their multitude of forms, and also contains concise but authoritative analyses of some key domains of visual culture, like drawing and painting, photography, info-graphics and scientific imaging. Challenging the unproductive divide between theory and practice *Image Studies* convincingly fosters the idea that actively engaging in image making processes will contribute to improving both scholarly and societal uses of visual representations. This text deserves a broad interdisciplinary readership.' - *Luc Pauwels, University of Antwerp, Belgium*

'This lively and literate book effectively situates image studies "in the making" ? that is, not only as an ongoing intellectual, cultural, and critical inquiry in a variety of disciplines (from art history to zoology) but also as a productive social activity in which the reader is asked to engage by way of concrete exercises. In succinct and thoughtful introductions to difficult concepts (such as iconicity, remediation, visuality, and "inner vision") and the work of key writers (such as Barthes and Berger), Manghani shows that an "ecology of images" can be both analytical and critical without sacrificing the precision required to deal with images in different domains and media. At every turn, he supplies illuminating examples from past and present, extensive extracts from influential texts, and enticing projects for further investigation, all of which help to ground the wide-ranging theoretical perspectives.' - *Whitney Davis, University of California at Berkeley, USA*

'Summarizing the current status of the field of image analysis and suggesting emerging possibilities for research, Manghani revisits notions of theory and practice, thinking and making, hand and brain, and thereby challenges students to address this divide as one of the critical tasks of our time.' - *Anne-Marie Oliver, The Pacific Northwest College of Art and the Ford Institute for Visual Education*

About the Author

Sunil Manghani is Reader in Critical and Cultural Theory at Winchester School of Art, University of Southampton, UK. He is author of *Image Critique* (2008) and co-editor of *Images: A Reader* (2006), an anthology of writings on the image from Plato to the present.

Users Review

From reader reviews:

Wilma Shay:

Here thing why this specific Image Studies: Theory and Practice are different and trustworthy to be yours. First of all reading through a book is good however it depends in the content from it which is the content is as delightful as food or not. Image Studies: Theory and Practice giving you information deeper including different ways, you can find any e-book out there but there is no publication that similar with Image Studies: Theory and Practice. It gives you thrill reading journey, its open up your personal eyes about the thing this happened in the world which is possibly can be happened around you. You can easily bring everywhere like in playground, café, or even in your technique home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Image Studies: Theory and Practice in e-book can be your substitute.

Garnet Veach:

Typically the book Image Studies: Theory and Practice has a lot details on it. So when you make sure to read this book you can get a lot of gain. The book was written by the very famous author. The author makes some research previous to write this book. This specific book very easy to read you will get the point easily after reading this book.

Eden Cohn:

Reading a book being new life style in this year; every people loves to learn a book. When you read a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. In order to get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, and also soon. The Image Studies: Theory and Practice will give you a new experience in examining a book.

Rita Beatty:

As a college student exactly feel bored for you to reading. If their teacher expected them to go to the library as well as to make summary for some e-book, they are complained. Just minor students that has reading's heart or real their passion. They just do what the teacher want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that looking at is not important, boring and also can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Image Studies: Theory and Practice can make you feel more interested to read.
