concrete5 Cookbook By David Strack

Over 140 recipes to help you develop websites using the concrete5 content management system

Overview

- Recipes for developing websites with concrete5, a popular open source content management system
- A useful guide for concrete5 novices and experts alike
- Contains blueprints of selected projects explained extensively with a top-to-bottom approach

In Detail

concrete5 is an increasingly popular open source content management system because of its incredible and easy-to-use interface. But, it also comes complete with a robust PHP framework, allowing web developers to create custom websites and applications with ease.

"concrete5 Cookbook" is a practical collection of solutions to tasks that both novice and experienced concrete5 developers face on a regular basis. Readers will learn multiple subjects, including full blueprints for developing an event calendar add-on and an image gallery block. Developers new to concrete5 will quickly learn how to customize concrete5 to their needs, and seasoned pros will find it an excellent quick reference for performing specific tasks.

"concrete5 Cookbook" will transform ordinary PHP developers into concrete5 experts capable of bending concrete5 to their will and unleashing the true power of this up-and-coming content management system. Throughout the course of over 140 recipes and 3 bonus project blueprint chapters, PHP developers will learn how to create custom blocks and dashboard interfaces as well as programmatically work with pages, files, users, permissions, and more. Discover the built-in Active Record support that makes working with databases simple and maintainable. Readers will also learn how to take advantage of the numerous helper classes included in concrete5, and will dive deep into the concrete5 MVC framework to create powerful custom websites and applications. Tie together all of the concepts learned in the recipes with 3 bonus chapters featuring complete

blueprints to create a calendar add-on, an image gallery block type, and tips on how to sell your themes and add-ons for money!

"concrete5 Cookbook" is a complete collection of recipes to solve the most common (and some not-so-common) tasks that concrete5 developers will face on a regular basis.

What you will learn from this book

- Manage pages and the sitemap
- Connect to and query the database
- Code real data models with Active Record
- Produce custom dashboard interfaces
- Make a custom theme
- Hook into system events
- Create an image gallery add-on
- Sell add-ons in the concrete5 marketplace and earn money

Approach

The Cookbook-style recipes allow you to go both directly to your topic of interest or follow topics throughout a chapter to gain in-depth knowledge. This practical Cookbook will cater to the needs of both intermediate and advanced concrete5 developers.

Who this book is written for

This book is geared towards intermediate to advanced PHP developers who would like to learn more about the concrete5 content management system. Developers already familiar with concrete5 will learn new time-saving tricks and will find the book to be a great reference tool.

Editorial Review

About the Author

David Strack

David Strack has been a software engineer for over 10 years. With a strong background in HTML, PHP, and JavaScript, he has developed websites for dozens of companies, large and small. David currently works for a small startup in California creating energy analytics software. He lives in Milwaukee, Wisconsin, with his wife, Sarah, and their crazy dog, Brewski. David can usually be found hacking away with JavaScript, designing mobile apps, watching pro football, and drinking craft beer.

Users Review
