Fish Bioacoustics (Springer Handbook of Auditory Research) From Springer

This new definitive volume on fish auditory systems will interest investigators in both basic research of fish bioacoustics as well as investigators in applied aspects of fisheries and resource management. Topics cover structure, physiology, localization, and acoustic behavior as well as more applied topics such as using sound to detect and locate fish.

Editorial Review

From the Back Cover

The study of how fish make and respond to sound has important implications for communication, physiology, behavior, and commercial techniques. *Fish Bioacoustics*, a new definitive volume on fish auditory systems, will interest investigators in both basic research of fish bioacoustics as well as investigators in applied aspects of fisheries and resource management. Topics cover structure, physiology, localization, and acoustic behavior as well as more applied topics such as using sound to detect and locate fish.

Contents:

- Introduction to Fish Bioacoustics *Richard R. Fay, Arthur N. Popper, and Jacqueline F. Webb*
- Hearing and Acoustic Behavior (Basic and Applied) *Arthur N. Popper and Carl R. Schilt*
- Structures and Functions of the Auditory Nervous System of Fishes *Richard R. Fay and Peggy L. Edds-Walton*
- Evolution of Peripheral Mechanisms for the Enhancement of Sound Reception *Christopher B. Braun and Terry Grande*
- Bioacoustics and the Lateral Line of Fishes *Jacqueline F. Webb, John Montgomery, and Joachim Mogdans*
- Orientation to Auditory and Lateral Line Stimuli *Olav Sand and Horst Bleckmann*
- Multipole Mechanisms for Directional Hearing in Fish *Peter H. Rogers and David G. Zeddies*
- Vocal-Acoustic Communication: From Neurons to Behavior *Andrew H. Bass and Friedrich Ladich*
- Active and Passive Acoustics to Locate and Study Fish *David A. Mann, Anthony D. Hawkins, and J. Mike Jech*

About the editors:

Jacqueline F. Webb is Professor of Biological Sciences, and Coordinator of the Marine Biology Program, at the University of Rhode Island, Kingston. Richard R. Fay is Director of the Parmlly Hearing Institute and Professor of Psychology at Loyola University of Chicago. Arthur N. Popper is Professor in the Department of Biology and Co-Director of the Center for Comparative and Evolutionary Biology of Hearing at the University of Maryland, College Park.

About the series:

The Springer Handbook of Auditory Research presents a series of synthetic reviews of fundamental topics dealing with auditory systems. Each volume is independent and authoritative; taken as a set, this series is the definitive resource in the field.

Users Review

From reader reviews:

Colleen Thompson:

The knowledge that you get from Fish Bioacoustics (Springer Handbook of Auditory Research) will be the more deep you digging the information that hide inside the words the more you get thinking about reading it. It does not mean that this book is hard to be aware of but Fish Bioacoustics (Springer Handbook of Auditory Research) giving you thrill feeling of reading. The author conveys their point in selected way that can be understood simply by anyone who read that because the author of this e-book is well-known enough. This particular book also makes your vocabulary increase well. Therefore it is easy to understand then can go with you, both in printed or e-book style are available. We advise you for having this specific Fish Bioacoustics (Springer Handbook of Auditory Research) instantly.

Bonnie Mentzer:

The reason? Because this Fish Bioacoustics (Springer Handbook of Auditory Research) is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will distress you with the secret that inside. Reading this book adjacent to it was fantastic author who also write the book in such wonderful way makes the content within easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you because of not hesitating having this ever again or you going to regret it. This unique book will give you a lot of rewards than the other book include such as help improving your talent and your critical thinking technique. So , still want to delay having that book? If I were being you I will go to the publication store hurriedly.

Frank Wimmer:

A lot of reserve has printed but it differs. You can get it by net on social media. You can choose the top book for you, science, amusing, novel, or whatever through searching from it. It is referred to as of book Fish Bioacoustics (Springer Handbook of Auditory Research). Contain your knowledge by it. Without making the printed book, it could possibly add your knowledge and make an individual happier to read. It is most essential that, you must aware about reserve. It can bring you from one spot to other place.

Terry Pullen:

What is your hobby? Have you heard in which question when you got scholars? We believe that that issue was given by teacher for their students. Many kinds of hobby, All people has different hobby. So you know that little person such as reading or as reading become their hobby. You have to know that reading is very important and also book as to be the point. Book is important thing to add you knowledge, except your personal teacher or lecturer. You discover good news or update with regards to something by book. Many kinds of books that can you go onto be your object. One of them is actually Fish Bioacoustics (Springer Handbook of Auditory Research).
