### Off The Grid With Diabetes By Sam Adams

There's an epidemic sweeping the United States. This illness affects millions of Americans and is the seventh leading cause of death in our country. Worldwide, six people die every minute from this fast-growing disease, totaling almost four million deaths each year. It's not AIDS or an exotic new tropical virus. It's diabetes. Over 90 percent of diabetes cases are type II, meaning these people were not born with this problem-they slowly destroyed their own bodies, likely without even knowing. Over the years, they gradually poisoned themselves with today's modern diet of processed and sugar-filled garbage. There is hope though and it doesn't necessarily involve pills or injections. It is possible to turn the tide and win the fight against diabetes, naturally. With the implementation of Obamacare and the economic train wreck our nation is facing, modern medicine may soon be out of reach for many Americans who live with this disease. Off the Grid With Diabetes will teach you the natural herbs and foods you can use to control your diabetes. You'll also discover the hidden poisons in the processed food at your local grocery store and how to avoid them from now on. If you have this disease, there are many things you can do to regain your life. And if you're one of the millions who are quickly headed for a diabetes diagnosis, you can learn the signs to watch for and the steps you can take to avoid this terrible condition.
